With 20 years of experience in Information Management, Supply Chain and Transport industries, our management team is well-versed in the nuances of Information Destruction.

INTRODUCING:

PATENT-PENDING TECHNOLOGY!!!

Service Optimization System™

For The Information Destruction Industry

Next generation Service Optimization tools to reduce cost, improve yields and differentiate your business in today's competitive marketplace.

So, You Say You Want A Revolution?

Imagine a world in which every service visit yields the most material possible. One in which your prices aren't directly comparable to the competition's. A world in which your trucks drive less; reducing cost, risk and carbon emissions.

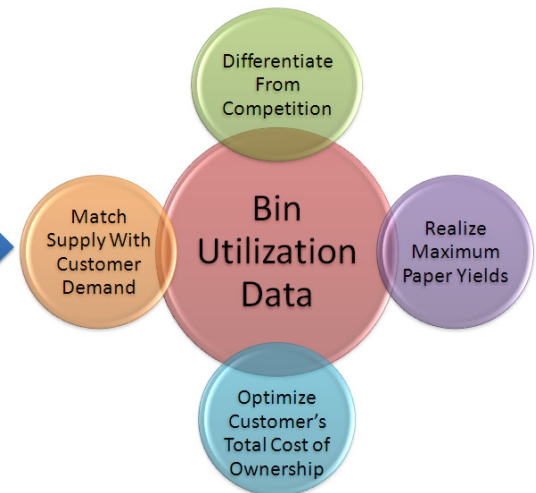

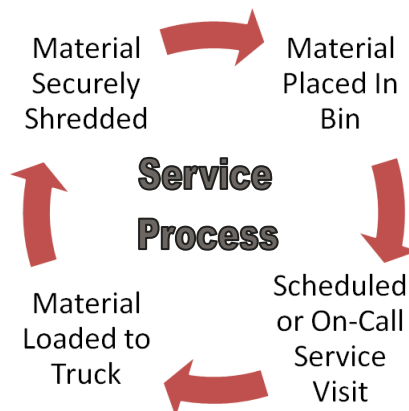

That world is here in the form of the **SOS Service Optimization System**, a revolutionary tool to match service provision with customer need, specially designed for your industry.

Combining the power of remote monitoring, data analysis, intuitive systems interfaces and plain old common sense, **SOS** allows you to know your customers' need for service **WELL BEFORE** your driver is dispatched!

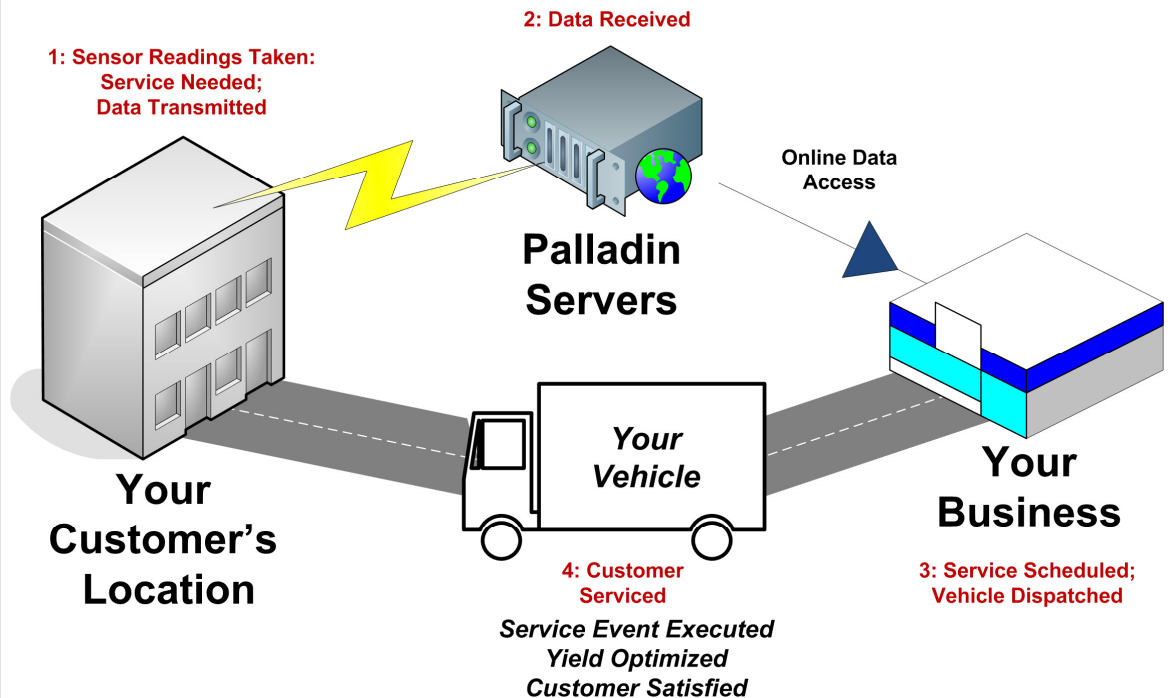

With Palladin's exclusive service optimization system, you are able to service your customers when needed, **optimize your cost structure and increase the satisfaction and trust of your customers.**

Enhancing Your Service Process Transforming Your Profitability Thrilling Your Customers

How It Works: Sending Out An SOS!

FEATURES

- Remote Monitoring
- Premium Service Analytics
- Ease of Installation
